**Definition:**

A physician who provides long-term, comprehensive care in the office and the hospital, managing both common and complex illness of adolescents, adults and the elderly. Internists are trained in the diagnosis and treatment of cancer, infections and diseases affecting the heart, blood, kidneys, joints and digestive, respiratory and vascular systems. They are also trained in the essentials of primary care internal medicine, which incorporates an understanding of disease prevention, wellness, substance abuse, mental health and effective treatment of common problems of the eyes, ears, skin, nervous system and reproductive organs.

Doctor Eric Tomomi Shigeno, [ Nah Nah, You Are Not Going To Get Away With It ]

<http://doctor-eric-tomomi-shigeno.fuckeduphuman.net>

Note: Notify - You Are Listed To @Fuckeduphuman.net : Video link Is direct served off site of YouTube. Occasionally, server response is slow and you may have to wait to cache mp4 video file. If you run into problems, the video presentation is worth the wait, or direct download it and watch later after download completes. [ The Old Method ]. Any current patients, I suggest that you take a copy of this video and store it on your mobile device and in medical session, tell the doctor you have a video to watch. If he refuses to watch it --- reflecting the message of the video --- "No More Lies", then he cannot conduct himself to be an honorable man much less an honorable care concern for your treatment.

Taking into account the deception/hypocrisy is what he defends instead of medical healthcare integrity.

He does not take into internal concern or care about this review:

★★★★☆ 11 months ago -   
This agency is FRAUDULANT in its services and practices when it comes to serving the HIV population and utilizing Ryan White Funding. My recommendation for any HIV client interested in signing with them is to run as far and as fast as you can...they treat HIV consumers with contempt and unprofessionalism.

 4

 **Gabriel Andrew Chavez**

This is what happened: [Vitals.Com Review](#) [ spoken voice text narrative interfaced ]

The reflection of this video, repeating into his view over and over and over through patients exposed to this message and digital object message will drive the hater of unbelievable holding attitudes. In the session of what occurred, I asked him very specifically if there was any kind of conflict of interest that he would have of consideration against his Hippocratic Oath to "Do No Harm".

In that harm has already been done onto me, the community is under an attack, the very essence of the role of a doctor here, to be someone who cares is a hypocrite to the highest order. If he cannot feel he can treat a certain class of patient, he should QUIT his JOB IMMEDIATELY!

He should change careers than to hold and conduct the underlying secret agenda of observed policy placement inverted role reality, they have subverted the good intent of the Ryan White Care Act into an observed system wide pretext policy inverted of the written policy.

This inverted message and action against the community states to those who can be subjected to these detachments, "Go Fuck Off and Die!" is the message being delivered into the affairs of hate of the contempt they actually hold onto the community.

Do these people think that such a state of rotten way thinking, exploiting persons who are infected with HIV to all means. If such defense of people holding contempt is true, what would make this doctor hold "the best" choice of your treatment onto the record?

What would prevent him from direct lying to his patients? Nothing, absolutely nothing. These people in these positions act as untouchables because they have an upper higher end administrative federal ploy of enabling this by the intentional turning a blind eye to this kind of illegal activity.

Go Fuck Off and Die is the standard observed policv allowance even if such is not a written

allowance for 30 years.

But now, since my conflict with this doctor, they have issued upward onto the HHS to change a policy in the department with President Trump's involvements, the right of "denial of care" due to any kind of form of irrational consideration, the doctor does not like you, or what your intention is to expose a conspiracy [ like I had been on course to get his assistance ], his action is to terminate care.

For his underthinking --- Get the dehumanized patient having a morality of honesty away from him...

Attempting to define some standards of care and integrity of the system they detest!!!

They want to be able to say "Fuck Off and Die" to anyone they so deem unworthy of their inalienable right to life, much less Liberty and their pursuit of happiness.

Being such a statement "Go Fuck Off and Die" is a totally UNAMERICAN concept.

That is what is represented behind the curtain when you undress for his examination. Really, what does he think such hatred holding for people do in their fantasy's mind?

OR

If they could get away with it, what hatred could turn into real world nightmares? If he is allowed to retain his position with this attitude and get away with it?

What is this country's morality come to?

When is it right to hold the belief and then onto the permissible action of #KillTheGays in what is supposed to be the Freedom Born This Way Country of the United States of America?

All you have to do is understand,

Since I put a challenge to the California Medical Board --- for he is violating the Medical Association Journal of Ethics to not hold his Fiduciary Responsibility [ according to their article position ] to repair the patient/physician relationship, he fails that ethical holding level, he fails any kind of possible way to hold honor to his hippocratic oath..... there is nothing in his way --- opps, another one bites the dust.

Like he gives a shit about the medical profession field of persons he is treating.

He obviously is suffering a delusion that no one can peer into his mind and report these conditions to everyone around and when Borrego Health under public pressure to get rid of him, do...

He will have nothing of options for reemployment when any new perspectives get to a google search of his name. He will be rotten exposed apples, not a savory relationship we would want in our organization. Borrego Health is kind of stuck with him for the moment. Their whole system is suspect under this to be as corrupt as corrupt can be.

That is the way he has left this unaddressed, unreconciled, in the silent of madness, the insanity of what he established to defend the set form declaration statements of an internal system position review of Foothill Aids Project. This review comes from the position of being one of a member of

the Inland Empire HIV Planning Counsel. Internal of the system review, the doctor cannot fathom why it would not be meritable stated to find immediate course of some kind of remedy? No, that is not what happened.

instead of me as his patient bringing up into a conversation what are normal details of a doctor/patient topic to discuss and understand some kind of rational reasoned offering of a caring hand, he offered me the boot. For we can't have that discussion in this community.

IT IS OFF LIMITS!

The patient that you so desired to get as fast and as far away as you could because you would not take the review of Aaron Jacobson into your community affairs concern and care to apply a higher authority effort address of "social correction" applied.... you inverted --- you are an inversion of trust, your an inversion of health, you are an inversion of madness belief.

He apparently defends and understood to the lowest of all lows to go why this Ryan White Care Act funded HIV/AIDS service organization agency of Foothill Aids Project holds this Google Review that he would not put digital footprints onto his moral agency become involved to the health and wellness of the entire regional area is obviously impacted by this review ---- what say he?

SERVICES TERMINATED FOR PATIENT WHO DARES QUESTION THE AUTHORITY RIGHT TO HATE MEMBERS OF THE HIV/AIDS COMMUNITY THEY ARE SO THERE SUPPOSED TO BE SUPPORTING. HYPOCRITES TO ITS HIGHEST OFFENSE!

This is not an isolated local single occurrence conflict. No, that is not what this is....

On Glassdoor, a collection of negative outlook reviews is available to show this kind of attitude is

ON GLASSDOOR, a collection of negative outlook reviews is available to show this kind of attitude is across the board and across the nation. It is a conspiracy at it's highest order, PEOPLE DIE UNDER SUCH WIDE SPREAD INFUSIONS OF OBSERVED POLICY OUT OF ITS INTEGRITY --

**"Disappointment and Mendacity"**  
Former Employee - Not Safe to Disclose in Portland, OR

Doesn't Recommend Negative Outlook Disapproves of CEO

I worked at Cascade AIDS Project full-time (More than a year)

**Pros**  
The community members living with HIV are some of the most dynamic and resilient people you may ever meet. Working with those who are still suffering profoundly impacts you deeply and personally. CAP has a mostly young vibe and the work is interesting due to its complex nature. Downtown location is convenient.

**Cons**  
Management is hostile to the union represented staff. The organization only works with a narrow part of the community yet markets something different to look more comprehensive than it is. Much of upper management is threatened by change, is

conflict avoidant to the point of dysfunction and is retaliatory when confronted. Often, people with poor skills are promoted to leadership and this creates frustration and a sense of unfairness highlighting backroom agreements meant to undermine. Morale is dreadful. In the past few years most staff have been fired, pressured to leave, or asked to work with compromised ethics. Gay, black, HIV+, and trans identified staff have been systematically marginalized. CAP treated HIV+ staff as second class citizens, ignored client request for change, and silences critics. If you go against CAP, even if justified, you will find it hard to work in the HIV community in Portland. The board is completely distant from the staff and the clients being served, and act condescending and unhelpful. You would think if 50% of the staff leave in a few months time, it might be a wake up call that there are big problems that can't be dismissed as "disgruntled" staff. Since CAP is the only game in town for HIV related needs, they have no checks and balances and no accountability when they injure the community they are claiming they serve.

#### Advice to Management

Stop displaying images and raising money through deception. Admit you do not serve the community at large and close your doors. CAP is not about HIV anymore, it's about retaining jobs and keeping people working at the expense of programing and directives that empower. If you want to be a LGBTQ health center then so be it, but do not pretend you are helping people living with HIV, because you are not. You are only focusing on addicts and the mentally ill. Also, an LGBTQ health group or HIV group with no gay or HIV+ leaders, or people of color managing direct services means you will be just like any other colonized public health care model that delivers incompetent care. The community does not need public health zombies, we have them already. We also do not need tokenized minorities to cover for the heteronormative, white, middle class faux professionalism that is the root of the HIV pandemic to begin with, and abundantly present in CAP management's ranks. There is a big problem when the public adores you and your clients and the community you claim to serve would rather go without than be at the mercy of a place they distrust and dislike.

ACCESS AIDS Care Logo

".....and another one bites the dust."

Current Employee - Anonymous Employee in Norfolk, VA

Doesn't Recommend

Negative Outlook

Disapproves of CEO

I have been working at ACCESS AIDS Care full-time

**Pros**

None come to mind at the moment and I am really trying to come up with one or two.

**Cons**

-Executive Director angry and VERY retaliatory. -Mismanagement of grant funds. AGAIN. - Executive Director still there even after extortion case. -Very unorganized. -Favoritism if your in the click. If not oh well. -Treats employees and clients like they are nothing. -Low pay for an extreme amount of committment. -ZERO ROOM FOR ADVANCEMENT. -If I could leave zero stars i would.. -I'm sure you get the picture.

**Advice to Management**

Restructure the entire organization starting at the top and working down. Why the Board does not see where the problem lies is beyond me which makes me look at the Board as well.

-----

Still waiting for a response to this,

How can this be the returned outcome considering the HHS is the administration of HIV Treatment,

**What is a NPI Number?** : The National Provider Identifier (NPI) is a unique identification number for covered health care providers. The NPI is a 10-position, intelligence-free numeric identifier (10-digit number). This means that the numbers do not carry other information about healthcare providers, such as the state in which they live or their medical specialty. The NPI must be used in lieu of legacy provider identifiers in the HIPAA standards transactions. Covered health care providers and all health plans and health care clearinghouses must use the NPIs in the administrative and financial transactions adopted under HIPAA (Health Insurance Portability and Accountability Act).

**Where NPI should be used?** : The NPI must be used in place of legacy provider identifiers, such as a Unique Provider Identification Number (UPIN), Online Survey Certification & Reporting (OSCAR) and National Supplier Clearinghouse (NSC) in HIPAA standard transactions. There are two categories of health care providers for NPI enumeration purposes. Entity Type 1 providers are individual providers who render health care (e.g., physicians, dentists, nurses). Sole proprietors and sole proprietorships are Entity Type 1 (Individual) providers. Organization health care providers (e.g., hospitals, home health agencies, ambulance companies) are considered Entity Type 2 (Organization) providers.

**Who must obtain NPI?** : All health care providers who are HIPAA-covered entities, whether they are individuals (e.g., physicians, nurses, dentists, chiropractors, physical therapists, or pharmacists) or organizations (e.g., hospitals, home health agencies, clinics, nursing homes, residential treatment centers, laboratories, ambulance companies, group practices, Health Maintenance Organizations [HMOs], suppliers of durable medical equipment, pharmacies) must obtain an NPI. The NPI will be used by HIPAA-covered entities (e.g., health plans, health care clearinghouses, and certain health care providers) to identify health care providers in HIPAA standard transactions. A covered health care provider, under HIPAA, is any health care provider who transmits health information in electronic form in connection with a transaction for which the Secretary of Health and Human Services has adopted a standard, even if the health care provider uses a business associate to do so.
